REASON FOR ALLOWANCE

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Bentson et al (US 5,298,311) discloses moisture and oxidation resistant carbon/carbon composites. Rousseau et al (US 4,976,899) discloses a process for the production of a composite material with matrix and reinforcing fibers of carbon. Wilson et al (US 6,264,045) discloses a filter media system. Klett et al (US 6,037,032) discloses a pitch-based carbon foam heat sink with phase change material.
2. The following is an examiner's statement of reasons for allowance: allowance of claims 1-8 is indicated because the prior art of record does not show or suggest a single layer coating infiltrated and deposited to all exposed surfaces of said substrate wherein said single layer coating is selected from the group consisting of silicon carbide and carbides formed from a group IVA metal as recited in claim 1.

NOTE: Klett et al (US 6, 037,032) discloses a pitch-derived graphitic foam carbon foam substrate (col. 6-8) and Klett et al does not disclose a single layer coating is selected from group consisting of silicon carbide and carbides formed from Group IVA metal. Bentson et al (US 5,298,311) discloses a single layer coating is selected from group consisting of silicon carbide and carbides formed from Group IVA metal (col. 9, lines 16-17) and Bentson et al does not disclose a pitch-derived graphitic foam carbon foam substrate. Even though, Klett et al and Bentson et al disclose some and lack some. However, there is no motivation to combine these two references.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
